

# Approach Anxiety Obliteration

Congratulations! You are just a few short hours away from getting rid of approach anxiety for good.

Your new hypnosis listening session is one hour. It contains background brain wave files designed to get your mind into a deeply relaxed and open state.

While you are in that state, you'll hear several voices in the background. You are not meant to consciously hear and understand these. Just relax and let the statements slip into your mind.

Depending on your current level of comfort when approaching women, several listening sessions may be required.

Just listen daily, and go where you can find plenty of women that you could approach. Continue to listen until you're able to approach with zero fear.

For best results, listen once per day, before falling asleep at night.

Please don't hesitate to contact me with any questions or concerns. I'd love to hear from you!
